

BUILDING BUILDERS OF INDIA

PLACEMENT ASSESSMENT REPORT
2024 & 2025
—
3RD EDITION

FOUNDERS' NOTE

Engineering Ambition

“India’s greatest export should be its builders.
We intend to make sure of it.”

At Scaler, our focus is simple: to build engineers aligned with where the world is going, not where it has been.

One of us is in San Francisco, where frontier AI is being built; RL environments, evaluation frameworks, and the systems defining what engineers do next. The other is in Bengaluru, observing what that means for India’s engineers. This connection from frontier to classroom, in months and not years, is what Scaler has built.

35,000 professionals have moved into higher salaries and roles that the market actively competes for. Many of whom come to Scaler first while building their own teams. That loop, alumni building alumni, is the institution working as it should.

**Abhimanyu
Saxena**

**Anshuman
Singh**

Co-Founder, Scaler

CEO'S NOTE

The Science of Outcomes

“India doesn't lack talent; it needs institutions that turn talent into dependable performance. That's what we build at scale.”

A placement report is easy to misread. The numbers reflect a moment; who was hired, where, at what level. What it doesn't show is the system that works like clockwork underneath. The curriculum decisions made eighteen months earlier, the AI learning companion adapting in real time. All product innovations that leads towards an outcome.

Over time, this system becomes a network of mentors, alumni, instructors, operators reinforcing each other. An institution matters when it becomes part of how the ecosystem functions, not a step within it.

This report reflects that shift towards consistency, not just outcomes. A shift from placement to preparedness.

**Amar
Srivastava**

CEO, Online Business,
Scaler

April 9, 2026

To
The Director,
Scaler,
Electronic City, Phase I
Bengaluru
Karnataka - 560100

Dear Sir,

Re: Assessment of Placement Data for the Modern Software and AI Engineering Program with Gen AI/Agentic AI (formerly Scaler Academy) and the Data Science and Machine Learning with Specialization in AI (formerly DSML), hereafter referred to as 'Software & AI Engineering – Gen AI/Agentic AI' and 'Data Science & ML – AI Specialization,' respectively, for batches from May 2023 to April 2025.

We have assessed the data related to CTC and designations as presented in the appended Placement Summary regarding the placements of learners of the Software & AI Engineering- Gen AI/Agentic AI and Data Science & ML (AI Specialization) courses, respectively, of Scaler.

The appended placement summary is based on the complete dataset of 11,444 placed Scaler learners (7,933 Software & AI Engineering – Gen AI/Agentic AI and 3,511 Data Science & ML - AI Specialization), with detailed analysis such as salary transitions derived from a sample of 2,517 learners (22%).

In this context, we confirm the following:

1. The assignment was for the assessment and analysis of the placement data of Scaler.
2. For the purpose of the Assessment, we have obtained all the data, information and explanations, which to the best of our knowledge and belief, were necessary from Scaler. The analysis and assessment have been carried out based on the same.
3. The primary data sourcing methodology from the learners was either 1:1 telephonic calls by Scaler or from the offer letters (wherever available) verified by B2K Analytics.
4. We have, on a random sample basis, verified that the learners in question are indeed bonafide students of the said courses at Scaler.

B2K Analytics Private Limited

P: +91 80 4040 9950 | E: info@b2kanalytics.com | www.b2kanalytics.com

CIN: U74900KA2015PTC081521

5. Considering that sharing sensitive information such as employment details and remuneration is entirely at the discretion of individual learners, data availability may vary. This is further driven by employment agreements and confidentiality clauses that restrict the sharing of such information.
6. The analysis has been done on a sample basis for learners whose placement information was available. The followed methodology for the analysis of the data is an assessment and not an audit.
7. Due to employee and employer agreements and confidentiality terms, B2K Analytics (B2K) has not independently sourced any information or documentation directly from the recruiters or Scaler learners.

Note: This letter should be read only in conjunction with the attached Placement Summary

Best Regards,

Ritaban Basu
CEO

1,00,000+ ENGINEERS ONE COMMUNITY

The Faces Behind The Numbers

Shriram Bhat

While I was familiar with Data Structures and Algorithms (DSA), I lacked the disciplined environment needed to master them. **Scaler emerged as that ideal partner... beyond the curriculum, the true differentiator was the Mentor Program.** My mentor provided critical guidance during my formative stages, while the placement support from Rohith Reddy Patluri and Piyali Barai was instrumental in bridging the gap between my skills and industry opportunities.

Sr. Software Engineer II,
HCL Software

Software Engineer III,
PayPal

**Scaler bridged the gap**

between my six years of experience and my ambition to crack a top-tier tech role. **The comprehensive curriculum in DSA and System Design provided the depth** I needed to become a well-rounded professional, eventually securing my dream role at Microsoft.

**Aditya
Kumar**

Lead Software Engineer,
Oneshield Software

SDE II,
Microsoft

Upskilling with **Scaler** has been **the most defining decisions of my career**, culminating in my new role at Amazon. The journey involved 125 days of consistent coding, over 200 hours of **intensive learning, and solving 300+ problems to solidify my technical foundation.**

**Ram
Sankar R**

SDE III, Full Stack Developer,
Rheo AI

SDE II,
Amazon

Scaler played an essential role in my journey to landing an SWE role at PayPal. The curriculum provided real-world exposure, while the ecosystem of **mock interviews and technical assessments helped** me bridge the gap between theory and industry standards. More importantly, it strengthened my problem-solving skills and gave me the confidence to perform in real interview and engineering environments.”

**Yogeswaran
Selvaraj**

Senior Software Engineer,
ACL Software

Software Engineer II,
PayPal

Scaler oriented me to a blueprint on which I could base my progress on strong foundations. I learned Probability & Applied Statistics, Maths for ML, Python, SQL, etc. The structured learning path and consistency-driven approach helped me develop discipline, improve analytical thinking, and gain the confidence to approach real-world data and ML challenges more practically.

**Rohit
Kamra**

Specialist Data Scientist,
Accenture

Data Scientist,
Brillio

Joining Scaler helped me find a clear roadmap, stay consistent, and overcome challenges like self-doubt and lack of direction. The most valuable thing I gained was confidence: the belief that I'm making progress through consistency, guided learning, and continuous improvement.

Software Engineer,
Megh Computing

Sr. SWE,
CME Group

Priyanka
Nabapure

I attended mock interviews with Scaler mentors and resume review sessions, and got a call from PayPal. I cracked the first round of the DSA interview in under 30 minutes and went on to clear the other two rounds with ease. All this wasn't possible without the support of Ayush Giri, Subham Soni, & Deepak Kasera.

Application Engineer,
Amazon

SDE II,
PayPal

Vignesh
Raja

Scaler played an important role in landing an SDE-2 product-based role by strengthening my computer science fundamentals and problem-solving skills. Coming from a non-CS background, the **structured curriculum** helped me understand data structures, algorithms, and system design in a much deeper way.

Vikram
Kavide

SDE,
Reliance Jio

SDE II,
360 One Wealth

I dedicated 4-5 hours every day to practising on Scaler: a personal drive to improve myself holistically. I also had the privilege of **learning from Deepak Kasera**, whose structure and accountability gave me the ability to stay on track and commit to daily learning and practice.

Atharva
Deshmukh

Software Engineer,
Neebal Technologies

Software Engineer,
Citi Group

I was genuinely confused about my career path, so I **took a leap and joined Scaler Academy**. I even resigned from my job to focus completely on the course. Eventually, I got **placed through Scaler**, which was a big win. Scaler helped me when I really needed clarity and direction, and for that, I'm thankful.

Tarun
Kumar Jain

System Engineer,
Infosys

Software Engineer,
Indium Software

After dropping out of NIT-K, two things helped me get back on track: **joining Scaler, which gave me direction** and my mentor Shishir Chandra, whose guidance pushed me forward and kept me from dropping out. The most valuable thing **I gained from Scaler was confidence; the belief that "I can do anything."**

Rishi
Prakash

Sr. Software Engineer,
Accenture

Sr. Software Engineer,
Microsoft

The Builders Who Build Companies

DSML Intermediate Batch

Saurabh Gupta

While studying data science with Scaler, I have received exceptional support from the team, including guidance from my instructor, Shivank Agarwal and my peers, Mohit Singh Rautela. This has been invaluable in helping me overcome any obstacles & achieve my goals.

Data Scientist,
Mphasis

Co-founder,
Assessli

Academy Beginner Batch

Kamlesh Singad

Once I started my learning journey, I had only a basic understanding of concepts, but **Scaler helped me build a solid foundation** in problem-solving, DSA, and real-world system thinking. In 2023, I started my own company & today we are a team of 12 members, providing digital marketing services & training.

SEO Specialist,
Edusquadz

Founder,
Code with Kamlesh

From The World To Scaler

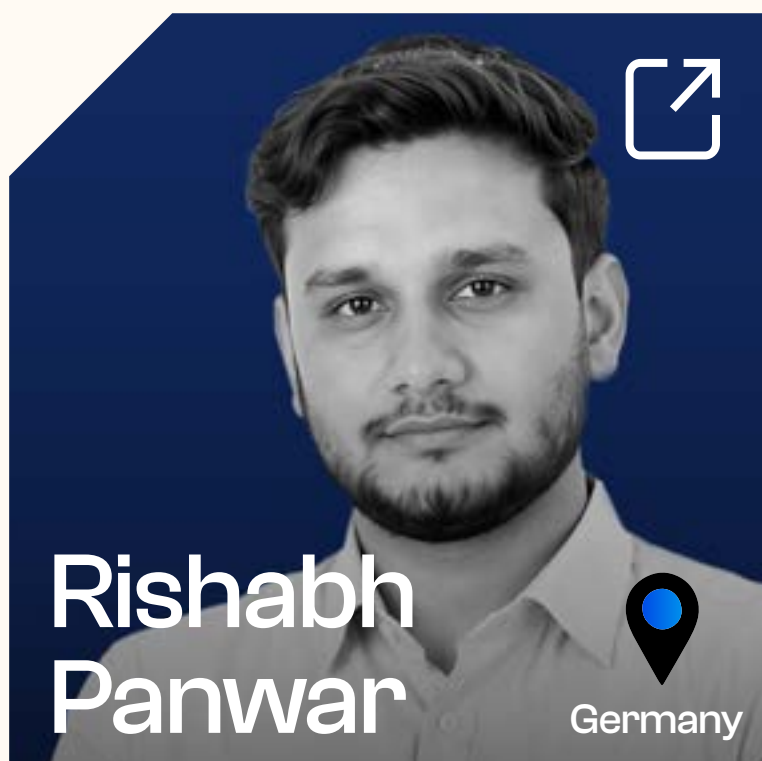

Project Development Officer,
Association Conseil pour l'Action

Founder,
The Fluent Professional Space

When I enrolled at Scaler, I was already a development project consultant with 16 years of experience. I wasn't looking for a credential, I was looking for a transformation. **Scaler's program gave me the technical depth** I needed to think like an engineer: microservices architecture, containerization, & distributed systems.

Software Engineer,
Unique Asia

Software Engineer,
Next Ventures

I can now solve coding questions in a flash and have landed three tech internships while pursuing the course. I could do this because I had the **necessary help from my time at Scaler**. I would like to especially thank my mentor, Gurpreet Singh, for supporting me through my hard times and for helping me achieve where I am today.

From Freshers to Veterans

Thanks to Scaler for the constant support, diving deep into SQL through LeetCode, HackerRank, DataLemur, and Scaler's platform truly paid off. It feels incredible to step into the field I've always dreamed of: Data Analytics at a company making a real impact in health and wellness.

**Gokul
Lakshmanan**

Student
/Fresher

Product Analyst,
Cureft

One fantastic lesson I've had on the Scaler journey is the importance of having a mentor; because of the one-on-one interaction, constant coaching, and the simple knowledge that someone is looking out for you, mentorship will significantly benefit your career.

Network & Collaborate with
Industry's Finest Talent

Scaler began with one belief:
**Indian Engineers can
be world-class.**

Today, over

1 lakh+ learners

have built real skills here.

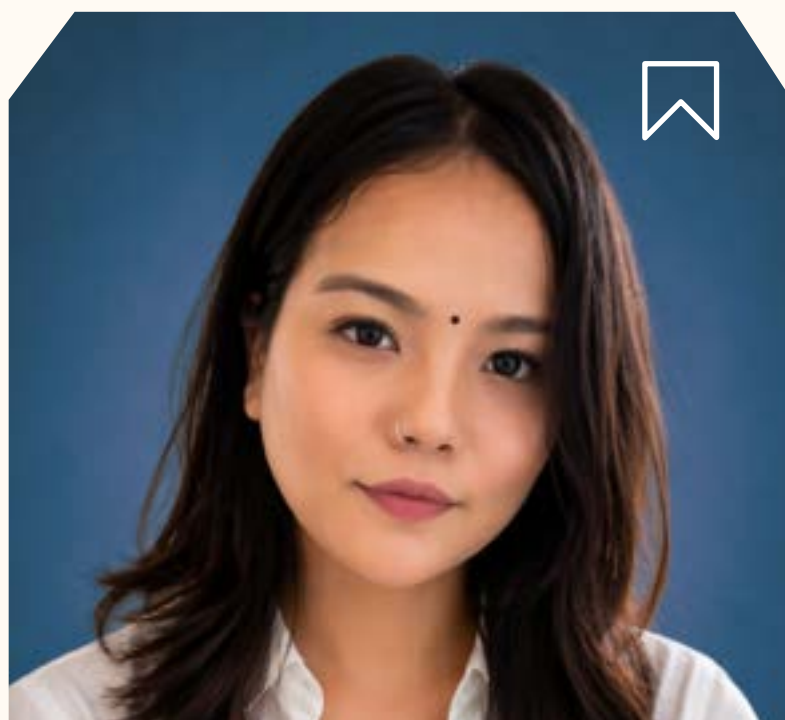

₹1,000 crore

in salaries every year, creating billion dollars
in value at small startups, unicorns and global MnCs.

90% learners

work across India's tech giants and unicorns.

Yet, the strongest proof comes from those who hired them.

**Flipkart**

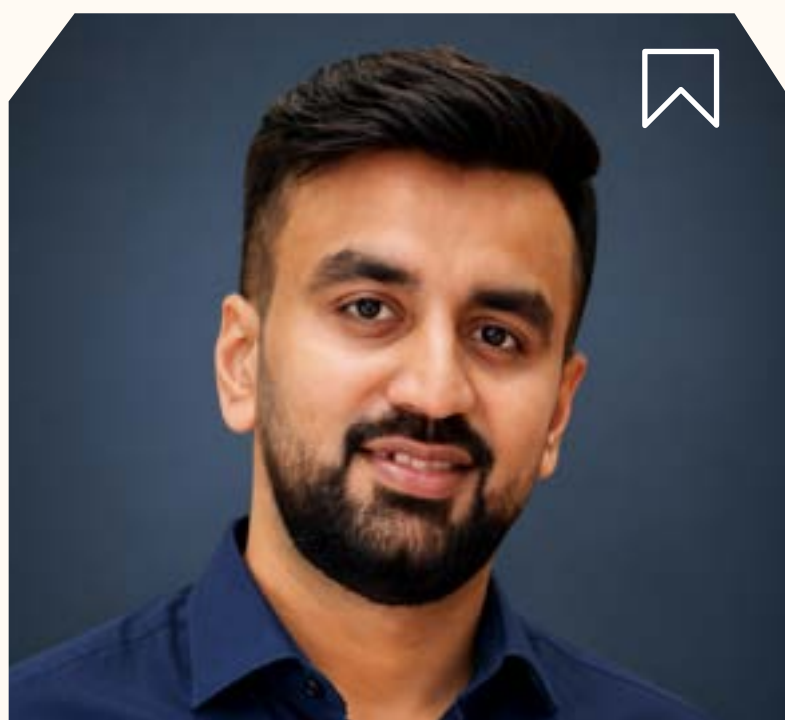

India's Biggest e-Com Platform
with 15K+ Employees

Karishma Thappa

Tech Talent Acquisition

In a market where finding the right technical talent can be both time-consuming and challenging, Scaler consistently delivered candidates who were not only technically strong but also highly practical and industry-ready.

I would highly recommend them to any organization looking to scale their engineering teams with top-tier talent.

**SAMSUNG**

267K+ Employees. 74 Countries.
Market Cap of \$230B

Abhishek Saini

Manager- Head of Talent Acquisition

Finding high-quality technical talent is often like looking for a needle in a haystack, but working with Scaler Academy changed the game for us. The Scaler learners we interviewed weren't just academically strong; they possessed the practical, hands-on problem-solving skills we actually need in a fast-paced dev environment.

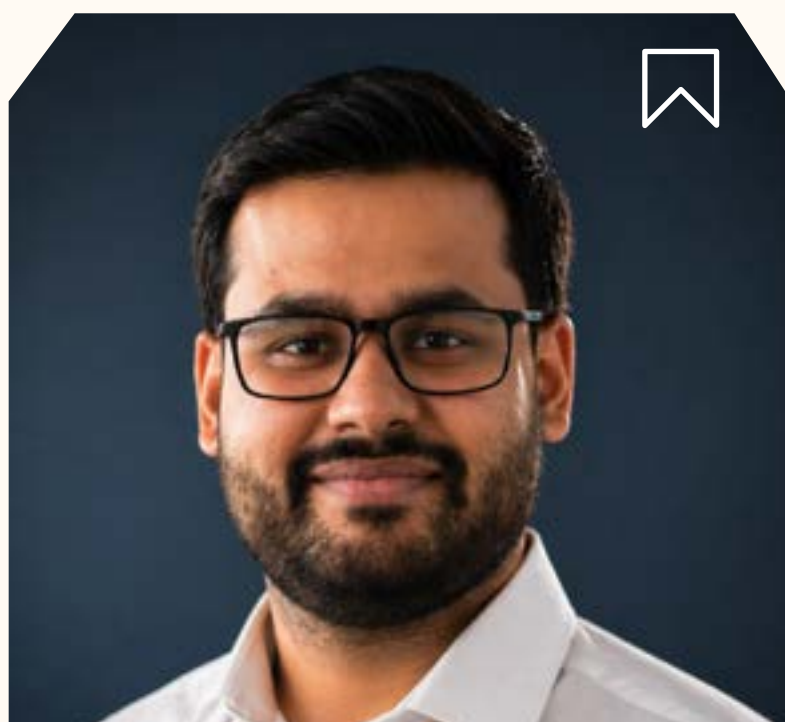

World's #1 networking company;
\$330 B Market Cap

Anirudh Shirur

Talent Advisor

It was a positive experience partnering with Scaler while supporting hiring initiatives at Cisco Systems. What truly differentiates Scaler candidates is their strong foundation in core concepts and their ability to apply these skills in real-world scenarios.

This has helped improve our hiring efficiency by reducing evaluation cycles and ensuring better alignment with role expectations.

\$1.2 B valued Indian Unicorn;
Clients include Meesho, Lenskart,
& 1000 more

Shrikant Dharmadhikari

Associate Director,
Head of Talent Acquisition

Scaler's upskilling programs bridge the gap between academics and industry needs, equipping candidates with practical expertise for real-world projects. Their industry-led curriculum and expert mentorship have consistently produced highly competent professionals who quickly adapt to workflows and deliver measurable outcomes.

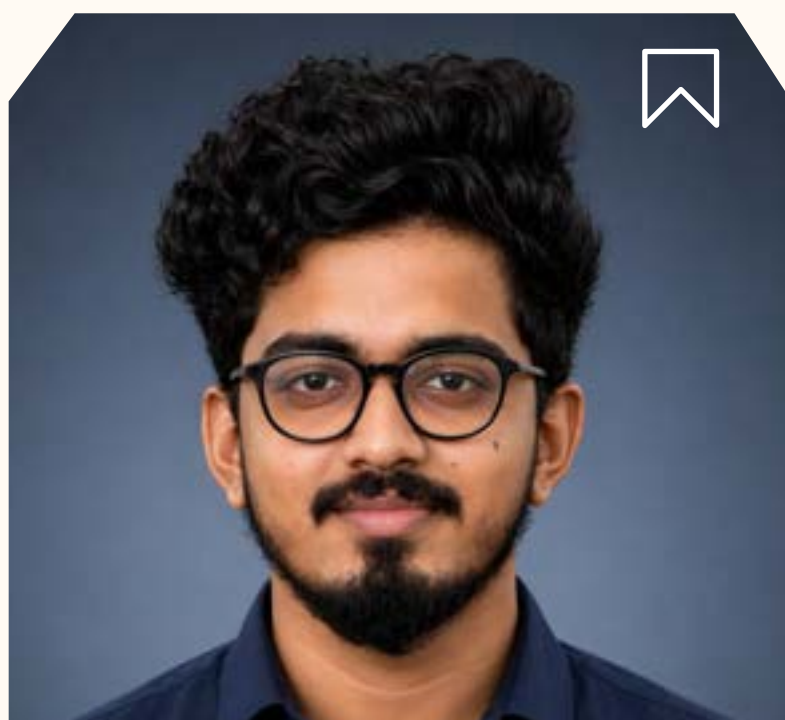

**VOLVO**

100 Years of Engineering Heritage
with 100,000 employees across
nearly 190 markets

Sunil Bhat M

HRBP, Volvo Group

We sincerely appreciate the quality of training and skill development that Scaler imparts to its learners, which reflects positively in their performance. Thank you for being a part of our talent acquisition journey. We look forward to continuing this fruitful partnership and onboarding more skilled resources from Scaler in the future.

Athul PS

Senior Talent Partner Tech

I've had the pleasure of hiring exceptional candidates through Scaler Academy from their Data Science cohort. Candidates have become technically equipped with the rigorous course curriculum they have gone through. I'm thoroughly impressed with them and wouldn't hesitate to recommend Scaler Academy to my peers.

Indian Unicorn operating across India,
Singapore, Middle East

Clinton Joseph

Lead Talent
Acquisition Specialist

Scaler's program stands out for its comprehensive curriculum and hands-on approach to learning. The students we've recruited from Scaler consistently demonstrate strong analytical skills, problem-solving abilities, and technical expertise. These qualities enable them to adapt quickly, apply real-world concepts effectively, and immediately.

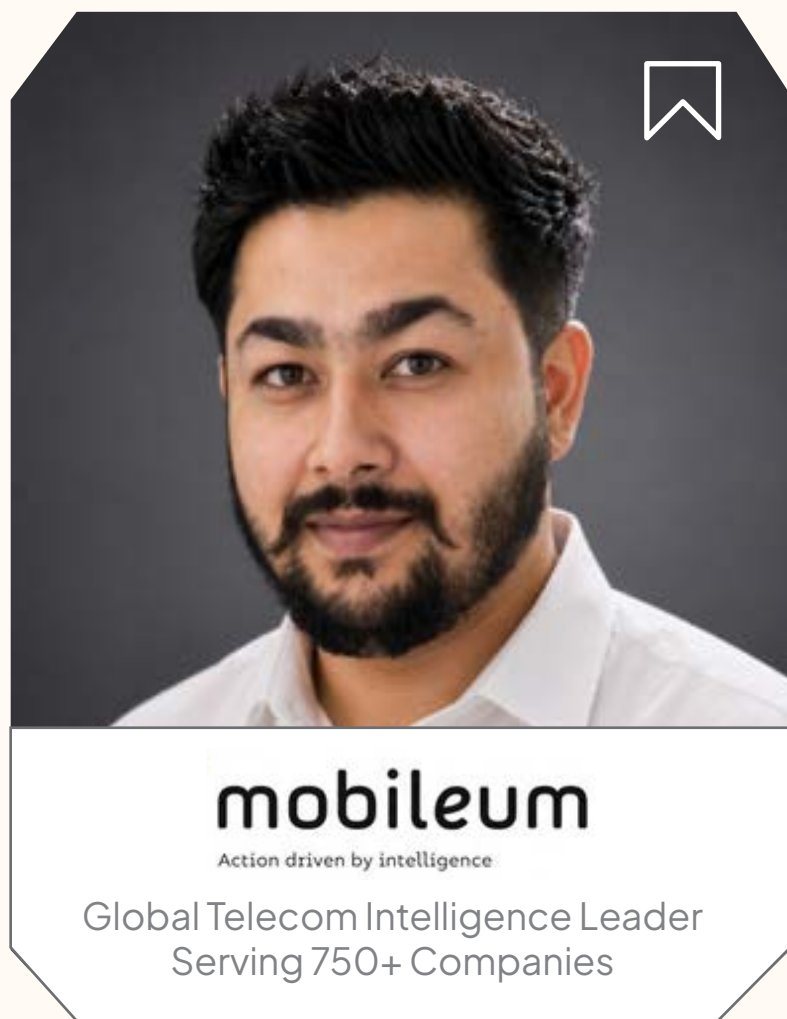

AI-powered FSM platform,
based in Silicon Valley & Bangalore

Animesh Shrivastava

Head of Customer
Engineering Practice

It was a great experience interacting with your students from Scaler, while trying to identify candidates for the web development team. The quality of the training program at Scaler is tremendous and it shows in the know-how of students coming through the programme.

Prayas Sharma

Talent Acquisition

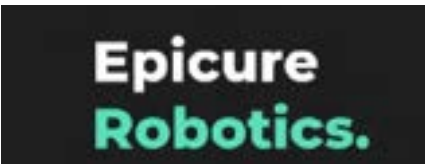

I wanted to thank you for partnering with us and fulfilling our hiring needs by helping qualified developers join Mobileum and contribute to our vision and growth. We've had several successful closures and look forward to more. The quality of talent, smooth coordination, and support throughout the hiring process have made this collaboration valuable. Appreciate your time, effort, and commitment to delivering the right talent.

Venkat Sai Krishna

SDE 2

We have successfully hired candidates from Scaler for roles such as SDE, Android Developer, and Frontend Developer. The individuals we've hired through Scaler are performing well and adapting quickly to our workflows. The hiring process was smooth, and the quality of candidates met expectations. Looking forward to continuing this partnership.

Bangalore-based Deep-Tech Startup

Aditya Mehta

Co-founder

We had a great experience engaging with students from Scaler while identifying candidates for our web development team. We truly appreciate the quality of Scaler's training programs and the calibre of students coming through them. The strong talent pipeline being built through these programs will certainly help organisations like ours find skilled and capable professionals.

India's first blockchain-based Open Talent Network with 3 Million+ individuals & 15K+ businesses

Puneet Gupta

CTO

We have been collaborating with Scaler for the past couple of years to hire software engineering talent at Repute, and the experience has been excellent. We are happy with the quality of candidates Scaler provides, as they come equipped with the necessary skills to contribute effectively from day one. Additionally, the Scaler team supports us end-to-end making the hiring process seamless & efficient.

4.9

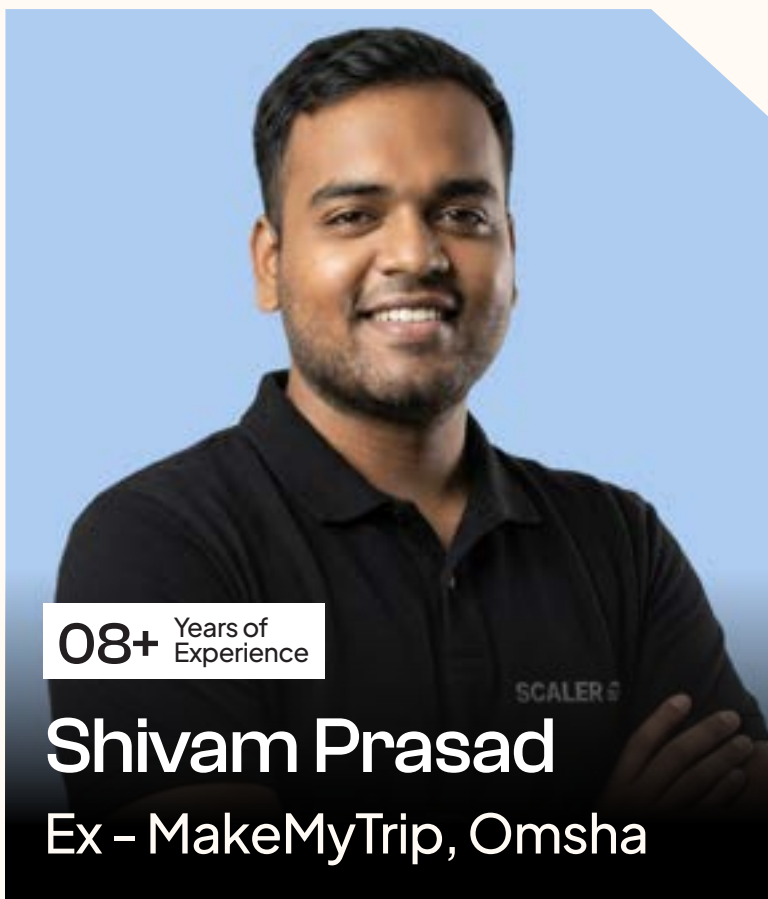

Average Class
Rating

Our learners come from diverse backgrounds, from experienced engineers to professionals from finance, operations, and non-technical fields. They recognise that fluency in data and technology is now essential. Their rigour stays the same; what changes is how we guide each learner toward it.

Every programme at Scaler is built by industry practitioners who've worked on systems used by millions. We don't just teach concepts; we teach how real engineering and data decisions are made, with the standards the industry demands today. India has no shortage of ambitious talent. Scaler is built to match that ambition and keep pushing it further.
